

STONE BLOCK

20kg

A salt block containing ammonium chloride used to treat and prevent urinary calculi, commonly known as 'water belly'.

TYPICAL ANALYSIS

Ammonium Chloride	1% (10g/kg)
Salt (NaCl)	80%
Calcium Carbonate	9%
Molasses	10%
Selenium (Se)	26mg/kg

FOR ANIMAL TREATMENT ONLY.

**THIS PRODUCT DOES NOT CONTAIN
RESTRICTED ANIMAL MATERIAL.**

Olsson's Stone Block is a supplement for stock that are on diets predisposed to bladder stone formation. Bladder stones are usually only a problem in steers, when stones block the urethra and prevent urination. Factors that predispose stock to stone formation include the high phosphorus levels in grain, excess sodium bicarbonate in the diet (used to help prevent acidosis), and reduced water intake due to poor water quality. Vitamin A deficiency can also be a cause of bladder stones in cattle that have been on dry feed for prolonged periods.

DIRECTIONS FOR USE

Feeding Instructions:

Sheep: 5-10g per head per day

Cattle: 50-100g per head per day

Intake is recommendation only. Higher intakes are normally the result of mineral deficiencies.

For use in cereal pasture with grain rations.

Avoid contact with skin and eyes.

Storage Instructions:

Store out of direct sunlight and under cover. Edible carton and packaging.
